

Swiss Institute of
Bioinformatics

Enhance your skills with our bioinformatics courses

Receive expert training from our data scientists

Join the ranks of cutting-edge bioinformatics professionals and researchers with SIB's comprehensive training offer. Our courses are designed to provide you with the latest tools, techniques, and knowledge in bioinformatics.

Top reasons to join our courses

- 🐾 **Expert-led courses:** Learn from leading national and international scientists from our network and partner institutions.
- 🐾 **Hands-on learning:** Dive into real-world applications and gain practical skills that you can apply immediately.
- 🐾 **Cutting-edge curriculum:** Stay at the forefront with up-to-date courses that cover the latest advancements in bioinformatics techniques and resources.
- 🐾 **Flexible learning options:** Choose from a variety of formats to fit your schedule and learning style, from in-person and streamed classes to open online material.

Start your training now with our:

Our training offering

“Working in a center of expertise for genetic analysis and DNA sequencing services, I have greatly valued the courses offered by SIB. Taught by field experts and available in various formats, these courses have enabled me to efficiently integrate our analysis pipelines with the latest software and methodologies.”

Patricia Otten, Bioinformatician at Genesupport SA
